TWE mountain
biking wheelsets
that are light,
strong, reliable
and TUFF!!

CUSTOM BUILT WHEELSETS

**Custom
Built**

My name is Greg Ryan and I would like to welcome you to a new opportunity to enhance your cycling experience. This unique opportunity enables you to purchase fully customised wheels built to the highest level at unbeatable prices. It involves talking to the wheelbuilder directly – me – not a salesperson or middleman. We discuss what the ultimate wheelset would be for you, to suit your type and style of riding.

Whether you're into road, triathlon, mountain bike or just social riding for fitness, my wheelsets offer an outstanding combination of long-lasting performance, reliability and durability.

My range allows you to choose between different hub, spoke & rim combinations to produce a set of wheels that perform just the way you want them to – customised for you and your riding style.

Carbon Wheelsets as light as 970g per pair can be made, all the way through to monster tuff downhill wheelsets. Other wheel 'name brands' typically have 4-5 models in their range and don't really cater for lighter or less powerful riders. They can't because they don't know who will end up on their wheels. For example, Shimano and Mavic only make alloy wheels down to approx 1600g. TWE Alloy Wheelsets go down to 1300g. Name brands only offer 1 spoke combination per wheelset. I have hubs and rims drilled with 16 holes, 20, 24,

28, 32 and 36 holes, which all offer different lacing patterns on top. With name brands you only have 1 colour option. My wheels are available in some cases with silver or black spokes and/or hubs. I also have custom coloured stickers available as an option so you can fully co-ordinate your bike's colour scheme.

To ensure a high level of quality control, every wheel is built and checked using a DT Swiss Tension Gauge before being certified and individual wheel's serial numbers recorded, along with the customer's details. No manufacturer in the world is this comprehensive.

If any warranty issues arise, you will be treated with respect and consideration - not accused of "tampering!". In some cases I offer a crash-replacement warranty whereby you don't pay full repair costs and the wheels will be fixed or replaced at heavily discounted rates. The details of this is stipulated on the order/quotation form and on record. *My service simply blows our competitors out of the water!*

In summing up ... if you're into riding really fast, want trouble free perfection for a long time, and are really into the "look" of your bike, then you should try a set of my wheels.

TWE Wheels. Setting new standards.
